Dear Mr. Hansen

Re: Directional Drilling of water line and Crossing Agreement

This will inform you that County Council will approve you to directionally drill a water line from your water well – located on Lot 5-7, Block 2, Plan 4950EO to one lot where you plan to build your home Lot 15-17, Block 1, Plan 4950EO. This consent to place the water line in the road allowance is conditional upon the following. As per Alberta Environment regulations, a water well can only service one home otherwise it is considered a municipal water system that is subject to Alberta Environment Regulations. If the well is used to service any other home, this consent will terminate and the County will require the line to be plugged.

As well, you will put a Restricted Covenant across all your properties that the water line will touch (Lots 5-7 & Lot 4, Block 2, Plan 4950EO; Lots 15-17, Lot 18, Lot 19, Lot 20, Lot 21, Lot 22-23, Block 1, Plan 4950EO), providing the right for the line to service the other property, to be located there, and that no other connection can be made to the water line. The County requires the opportunity to review the Restricted Covenant and evidence that it is registered prior to the drilling under the road.

The County will have a staff member on site on the day that you are directionally drilling. Please advise me what date and time this will take place.

If you have any questions or require clarification regarding this, please do not hesitate to contact me.

Sincerely,

Sheila Kitz, CLGM
Chief Administrative Officer
