Re: Proposed Development NE21 59 11 W4M
File Number D-2016-C1

This is an official appeal to the proposed Ashmont Sewer Lagoon Upgrade.

We oppose this development. Our concerns are:

1. Air quality and pollution.
2. Possible health issues because of poor air quality.
3. Environmental issues for Batty Lake.
4. Decrease market value for our properties.
5. Ability of resale of our properties at all.
6. Increase in traffic.
7. Noise pollution resulting from increase traffic.
8. Possible soil issues for vegetable gardens.
9. Concerns regarding dissolving Dacyk Sub division.
10. No longer able to drill water well.

Possible solutions to this issue include:

1. Moving the lagoon further from residential property.
2. County to purchase our properties.
3. Other forms of compensation.
