To Crystal StArnault

Re: Cancellation of registered road / trail plan 7864AU

As per our conversation about requesting the cancellation of the registered road on  
Legal SE-56-5-W4

The road/trail at one time was used for the old ferry crossing the ferry will never be used again and the road/trail veers off the road allowance. We would like to have it returned to private land.

We would like to not have to maintain the road/trail for other people's use at our expense. The use of this road/trail causes damage because there are natural springs near the river wrecking the road/trail causing huge ruts and a mess. (which this road/trail veers of your road allowance)

We have had expenses that entail maintaining the road/trail. We have had to purchase gravel, use equipment, with every use by other people it takes many months to dry up and fix, and replace gravel. (We try to maintain the road so we can have access to the river.) This has become pricey for us the private land owner to allow access to people on a county road that is not maintained by the County of St. Paul , but maintained by the private land owner. (we have asked for maintenance by the County of St. Paul this request was denied)

The County has demanded we remove our gates, this will create even more damage more mess and more expense for us the private land owner not the County of St. Paul

We would just like to ask if you could just terminate this registered road /trail which veers of the road allowance not the road allowance. There has been no maintenance done to this road by the County of St. Paul as it sits.

Again, we just are asking to cancel the registered road / trail not the road Allowance

Also, we don't believe we need to carry liability insurance on a road/trail that is owned by the County of St. Paul
