Dear County Council:

**RE: SW 1-57-10-W4  
Roll #10701300**

We own the above property and there is an undeveloped road allowance located directly along the west side our property. There are numerous quads, sleds and automobiles that use this road allowance leaving large amounts of garbage and continuing to tear up the portion of road that currently exists as undeveloped road allowance.

Due to the large amounts of traffic and reckless use, this creates large pot holes and at different times of the season large mud holes on the road allowance. I continue to take care and work this area to be able to access my property from the North side. We constantly pick up garbage and other debris that is left behind.

Located on both the North and West side of the above legal is an undeveloped Road Plan 3625EO. This portion of road plan only allows vehicles to go partial way on the North side as the area is very swampy, rough and is unable to provide vehicle access.

I am aware that there is a possibility of licensing the undeveloped road allowance, however not being able to lock the gate will still allow vehicles to destroy the existing portion of old road that is currently there and that we currently use.

I would like County Council to consider a few different options:

1. Selling us this portion of Undeveloped Road Allowance located directly west of my property.
2. Proposing to close all of Road Plan 3625EO, located in the SW 1-57-10-W4 and reverting that land back to my title. This would then allow me to close off access along the North side of my property.
3. The County to provide gravel on the Undeveloped Road Allowance, to help me maintain the portion of the road that currently exists.

I appreciate your time and I look forward to meeting with you to consider my request.

Yours truly,

Henry & Bibiane Foisy
