

We all enjoy the privilege of using motorized transportation to get down to the lake.

The posts serve to protect the property at the lake shore and also helps to restore a bit of privacy for the lake front owners that no longer can enjoy this since the lake has receded.

Please replace the center post if you need to remove it to bring a larger vehicle down.

Please limit the use of large vehicles for the times they are needed when performing seasonal work such as putting and taking out docks etc.

Please limit the use of this trail as transportation to and from the lake it is not to be used for trail riding

Please stay on the path and refrain driving on the riparian area

Failure to do so many result in the loss of the privilege for all of us to continue using motorized transportation.
